Cabinplant[®]

Precise by nature

Fish - Seafood

Meat - Poultry

Fully automatic weighing and batching of large portions at high speed

Make the most of your raw material

Speed, flexibility and accuracy are key parameters when optimizing your cost of production.

The Cabinplant multi batcher has been developed on the basis of 40 years of experience within the food industry. The multi batcher is tailor-made to match individual requirements for handling of large portions or products.

Innovative ideas

Cabinplant's multi batcher is the first batcher based on combinatorial weighing. Compared to other conventional batch systems, our fully automatic multi batcher performs accurate combinatorial weighing at high speed and can handle large portion sizes e.g. whole pelagic fish, meat or meat by-product.

Advantages

- Accurate combinatorial high-speed weighing
- Reduced give-away (5 times less than other systems)
- Hygienic design - easy to clean
- Logic process interface - easy to operate
- Rapid change to other product by recipe control

Cabinplant®

Fast return on investment

Let's look at the figures

Speed, flexibility and accuracy are key parameters when optimizing your production. Let us take a closer look at some of the figures from one of our customers.

The accuracy of our multi batcher installed at our customer is approx. +/- 30 g per weighed out portion which is a significant reduction of give-away compared to their earlier solution. A conservative estimate will state that our customer reduced their give-away by 75 g per portion.

The product in this example is valued at EUR/kg 2.50. If we add up the reduction of give-away on a yearly basis it comes to a total reduction worth EUR 180,000.

75 gram * 10 batches/min * 60 minutes/hour * 8 hours/day * 200 work days/year * 0,001 gram/kg * 2.50 EUR/kg = 180,000 EUR/year

Pioneering food processing since 1969

Cabinplant is a leading global provider of tailor-made processing solutions for the food industry. Our main focus areas are within fish, shellfish, vegetables, fruit, berries, meat and poultry and convenience foods. Additionally, we provide multihead weighing and packing solutions for a wide range of industries.

In close cooperation with our customers, we develop, manufacture and market innovative process and packaging machines with built-in knowhow that optimize yield, throughput and product quality.

We are a global company with headquarters with headquarters in Haarby, Denmark, and we employ more than 230 people and have subsidiaries in Germany, Spain, Poland and USA as well as a sales network of agents in more than 30 countries worldwide.
